What is Nexora?

CORE IDEA

A swarm of 16 specialized AI agents evaluates, refines, and structures any startup idea in real-time — turning a raw elevator pitch into a comprehensive intelligence report.

OUTPUT

Success Probability Score, SWOT analysis, competitor mapping, and a fully structured pitch deck — all generated in under 60 seconds.

INNOVATION

LangGraph orchestrates multi-agent reasoning. AI personas — Tech Lead, Skeptical VC, Market Analyst — debate and stress-test the idea from every angle.

Why Startups Fail

90%

Startup Failure Rate

Primarily due to lack of market need and poor business models

Weeks

Time Lost to Research

Founders spend months on research before writing a single line of code

\$\$\$

High Consulting Costs

Thousands spent on advisors and market research firms before launch

Bias

Confirmation Bias

Passion blinds founders to objective, honest feedback about viability

What We Set Out to Achieve

01

Automate Idea Validation

Reduce startup validation from weeks to seconds using advanced LLMs and multi-agent orchestration.

02

Eliminate Confirmation Bias

Objective, data-driven feedback through contrasting investor and expert AI personas.

03

Structured Output

Auto-generate SWOT analysis, competitor reports, and financial risk assessments automatically.

04

Accessible Mentorship

Democratize Silicon Valley-level startup mentorship for anyone with an internet connection.

Traditional Approach vs. Nexora

TRADITIONAL APPROACH

Manual Google research for competitors

Generic ChatGPT single-prompt advice

Weeks of work + expensive consultants

Unstructured, biased output

NEXORA

16 specialized AI agents debating in real-time

Multi-perspective investor panel simulation

Comprehensive plan in under 60 seconds

Interactive Next.js dashboard with structured data

How It All Connects

CLIENT

Next.js Frontend

Vercel · WebGL · Zustand · Framer Motion

AUTH

Clerk Authentication

Secure session management · User login

API GATEWAY

FastAPI Backend

Hugging Face Spaces · Uvicorn · Python

AI ENGINE

LangChain + LangGraph

16 AI Agents · Groq API · Llama 3 70B

DATA STORE

NexaMed AI — B2B SaaS for Clinics

PROBLEM & SOLUTION

Clinic staff waste 40% of their day on manual insurance verification, billing codes & follow-ups. NexaMed integrates with EHR systems via a fine-tuned LLM — auto-calling insurers, calculating out-of-pocket costs, and texting patients a payment link before they arrive.

MARKET & REVENUE

150,000+ independent dental & optometry practices in the US
\$499/mo flat subscription + **\$0.50** per processed transaction
vs. Weave: competitors only handle basic texting/VoIP;
NexaMed does full insurance verification & coding

3

Pilot Clinics Testing Beta

\$1.5M

Seed Round Target

40%

Admin Time Saved

SWOT SNAPSHOT

S EHR integration + AI voice agent

W Regulatory / HIPAA compliance risk

O 150K+ underserved indie clinics

T Weave & incumbents may add AI

What's Next for Nexora

Nexora bridges the gap between a raw idea and a validated business model — proving that multi-agent LLM orchestration can effectively mimic a panel of human experts.

FUTURE 01

Live Competitor Intelligence

Real-time web scraping for live competitor pricing and market cap data during evaluation.

FUTURE 02

Export to PPTX / PDF

One-click generation of a downloadable, professional pitch deck file.

FUTURE 03

Investor Matchmaking

Connect high-scoring ideas with angel investors via automated email outreach.

NEXORA

From Idea to Intelligence. Instantly.

Multi-Agent LLM · LangGraph · Groq · FastAPI · Next.js
